

DID YOU KNOW?

UP TO
75%

...of car seats materials are recycled or re-purposed! That's over 500 tonnes that could be saved from New Zealand landfills each year.

4%

HARNESSES & STRAPS

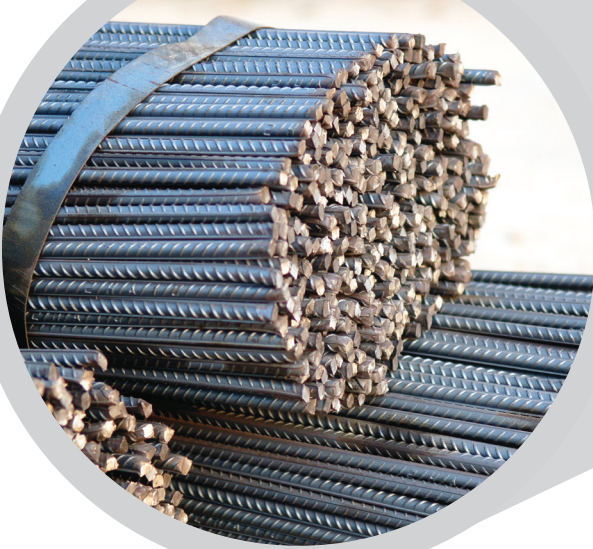

Used in the production of bags made from recycled products.

25%

TEXTILES & OTHER NON-RECYCLABLES

Includes unlabeled plastics which go to landfill. We're always looking at new ways to recycle or repurpose these materials.

13%

METAL PARTS

Recycled through scrap metal merchants - wide variety of end uses.

58%

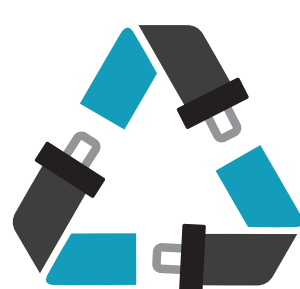

PLASTIC

The majority of material is polypropylene (♻️ 5 PP) and high density polyethylene (♻️ 2 HDPE) plastic which can be recycled in New Zealand.

Average percentages based on our South Island processing data.
